itemize and enumerate

This is a demonstration of various environments. The first is `itemize`:

- Item 1
- Item 2
- etc.

Usually I'll use `enumerate` as well:

1. Item 1
2. Item 2
3. etc.

Definition, Examples, etc.

All the common environments are available, e.g.,

- *Theorem*-related: `lemma`, `theorem`, `corollary`.
- *Common* environments: `definition`, `example`, `problem`.
- *Others*: `prev`, `observe`, `assumption`, `remark`, `intuition`.

I'll just show you two examples:

Example (A demonstration)

This is an `example` environment.

As previously seen

This is a `prev` environment.
